Subject: EPA experts on Marine Litter and Resource Efficiency

Thank you, Anna!

I will write a summary of Pruitt's statements and clear with you all...

Planning for the Fall, we are thinking about organizing an event on Circular Economy/Resource Efficiency and one on Marine Litter. The first one would take advantage of the EPA participation in the G7 Resource Efficiency meeting planned by the Environment Ministry for beginning of November (TBC in Rimini at Ecomondo <http://en.ecomondo.com/>); the second one would be in connection with "A Plastic Ocean" exhibit inauguration at the Genoa Aquarium during the Genoa Science Festival (end of October-beginning of November) and EPA could participate by DVC.

Could you let us know the names of the EPA experts in those two fields?

Thank you very much

Ex. 6 - Personal Privacy

PS - Unfortunately the dates are close to each other, with the G7 Health ministerial on Nov.5-6 on top! But we will try to make it...

Ex. 6 - Personal Privacy, I can't seem to find any previous speeches on line but we will keep looking and will share whatever we find.

Ex. 6 - Personal Privacy I'm actually not sure that I'm on your newsletter list as I haven't seen them but would appreciate being included.

All the best,
Anna

Thanks Ex. 6 - Personal Privacy

Mark, Anna, and Hodayah, we will clear this with you, and add you to our almost-quarterly newsletter list. We send this to Italian contacts, and some people in Washington. Anna, you already should get it. Mark and Hodayah, should we add you? Others?

Subject: EPA Administrator's speech

Dearest Anna and Mark,

We would like to prepare a "summary" (if it is possible.) of Adm. Pruitt's statements during his visit in Rome. In addition, the President of the Court of Appeals asked to get a summary of the discussion.

During the two roundtables (US Business and Judicial), he mentioned:

* to have three priorities: 1) Rule of Laws 2) Process, 3) Notion of Federalism

* to "continue engagement" on climate change, against which the US has already made progress in decreasing CO2 emission by 18% from 2000, and environmental pollutants (NOx and SO2) by 65% from 1980

* balancing the need for environmental protection, energy development and economic growth

Do you have a speech to share in order to better explain the highlighted parts? I took notes but they are not fully clear to me. I looked into the website and could not find any info.

Thank you!!
